CISs are generally medium-to long-term investments. Past performance is not necessarily a guide to future investment performance. The prices in respect of participatory interests in a CIS portfolio are calculated on a net asset value basis. This means the price is the total net market value of all assets of the particular portfolio of the CIS divided by the total number of participatory interests in such portfolio of the CIS. Any market movements – for example in share prices, bond prices, money market prices or currency fluctuations – relevant to the underlying assets comprising the applicable CIS portfolio in which participatory interests are held may cause the value of such underlying assets to go up or down. As a result, the price of the participatory interests linked to your policy may go up or down. Participatory interests in CISs are traded at the ruling forward price of the day, meaning that transactions are processed during the day before you or the Manager of the CIS know what the price at the end of the day will be. The price and therefore the number of participatory interests involved in the transaction are only known on the following day. The CIS may borrow up to 10% of the scheme value, and it may also lend any scrip (proof of ownership of an investment instrument) that it holds to earn additional income. A M&G CIS may consist of portfolios comprising different asset classes and types that are subject to different fees and charges. The Manager of the CIS will pay your Financial Adviser a standard ongoing adviser fee, which is included in the overall costs of the CIS. A summary with all fees and maximum initial and ongoing adviser fees in respect of each CIS linked to your policy is available on our website. The Manager of the CIS may, at its discretion, close your chosen CIS to new investors and to additional investments by existing investors to make sure that it is managed in accordance with its mandate. It may also stop your existing debit order investment. The Manager makes no guarantees as to the capital invested in the CIS or the returns thereof. Excessive withdrawals from the CIS may place it under liquidity pressure and, in such circumstances, a process of ring fencing withdrawal instructions and managed pay outs over time may be followed. A money market fund is not a bank deposit account and The M&G Money Market Fund aims to maintain a constant price of 100 cents per participatory interest in such scheme. A Feeder fund may only invest in a single portfolio of a CIS which levy its own charges that could result in a higher fee structure for these funds. Foreign securities including foreign CISs may be included in underlying CIS portfolios. As a result, those CIS portfolios may face material risks. The volatility of the CIS may be higher and the liquidity of the underlying securities comprising the applicable portfolio of the CIS may be restricted due to relative market sizes and market conditions. The CIS's ability to settle securities and to repatriate investment income, capital or the proceeds of sales of securities may be adversely affected for multiple reasons including market conditions, macro-economic and political circumstances. Further, the return on the securities comprising a particular portfolio may be affected (positively or negatively) by the difference in tax regimes between the domestic and foreign tax jurisdictions. The availability of market information and information on any underlying sub-funds may be delayed. The investor acknowledges the inherent risk associated with the selected CISs and that there are no guarantees. M&G Investments is a member of the Association of Savings and Investments of South Africa.
